In recognition of a Ton-for-Ton donation made in honor of

Sam Higgins

by

Alex Rutherford

COREworks has permanently and exclusively allocated on behalf of the recipient

2 COREworks offsets

generated by a tree planting project in Rockbridge County, Virginia.

Each verified offset is equivalent to preventing the release of one metric ton of carbon dioxide into the atmosphere.

This donation helps balance your own ecological footprint while also accelerating the roll-out of even more climate-friendly projects in our community.

Congratulations on being part of this important work!

Awarded on
the 1st of February, 2022
